

Energy Invitational

A Performance Engineering Program

STEM Showcase April 13, 2012 and Race Day May 19, 2012

The **Energy Invitational** is expanding its impact by engaging university, college and high school students together for the first time in a Performance Engineering project requiring the use of Science, Technology, Engineering and Math (STEM). This new program model provides students with an opportunity to develop **Emerging Technology Vehicles**.

Volunteers and sponsors for the **Energy Invitational** events are sought in order to provide tooling, access to state of the art materials and technologies, and to offset general event expenses. Your support for this program will create the foundation for building the educational pathway to high technology careers for our youth. For more information visit: www.smittyandtheprofessor.com or www.vitallinkoc.org
